PROFESSIONAL SUMMARY

Passionate Software Developer & ERP Consultant with a strong focus in Microsoft Dynamics 365 Business Central (BC) , Laravel, [ASP.NET](#) and Postman .I have a strong background in ERP development using AL and integration to third party portals. I'm proficient at building scalable, high-performance ERP applications that addresses fully the needs with a focus on clean architecture, responsive UI/UX, all-round testing and backend efficiency. I am also skilled in payment integrations with ERP & portals ensuring the smooth payment processes and synchronization with the ERP. I possess vast skills and experience in cloud deployment of applications and maintenance ensuring proper backup and seamless flow of operations. I enjoy solving complex problems and creating seamless user experience. Always eager to learn and grow, I thrive in fast-paced environment where innovation and collaboration drive success. Besides, I find fun in counter- intuitive debates around whys and what ifs.

SKILLS

- Programming & Frameworks: Application Language, Laravel, ASP.NET, JavaScript, Laravel, React, Tailwind and Bootstrap CSS.
